

Join us!

We have gathered experts in the field of dental surgery for you.

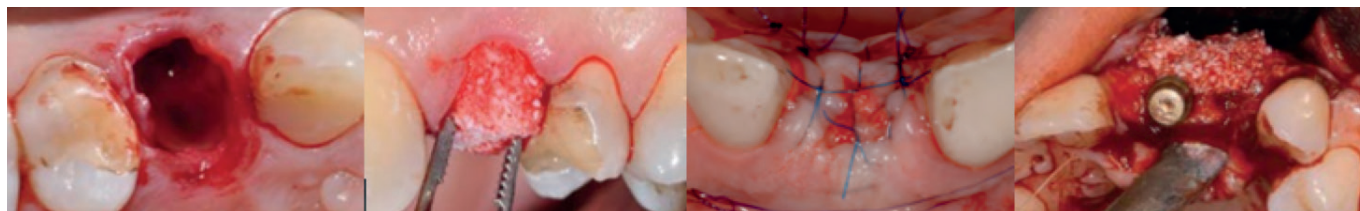

Copenhagen nov. 29-30th 2019

Welcome!

Come visit the Unident Surgical Symposium to learn more about how to refine your surgical skills. Best techniques with Piezo Surgery, Soft tissue Management, Extraction Socket, Esthetic Digital Implant Dentistry and Periapical Surgery.

We have gathered exciting experts, who will share their experience of indications, treatment strategies and prognoses.

Hope we meet in Copenhagen – ***There will be blood!***

FRIDAY NOVEMBER 29TH 2019

09.00-09.30 Registration and coffee.

09.30-10.00 Welcome to exciting days. Presentation by moderator Dr. Lars Pallesen .

10.00-11.15

"Esthetic Digital Implant Dentistry – Indications & Limitations" Lecture with Dr. Jaime Jimenez.

Different clinical scenarios and an evidence based update in digital implant dentistry will be covered, with the indications and contraindications; as well as the different steps in the clinical surgical and prosthetic procedures.

Dr. Jaime Jimenez
DSD & Implant Dentist, Spain

11.15-11.30 Coffee break and Exhibition.

11.30-12.45 **Continue: "Esthetic Digital Implant Dentistry – Indications & Limitations"
Lecture with Dr. Jaime Jimenez.**

12.45-14.00 Lunch and Exhibition + "Hands-On" tables.

14.00-15.15

"Extraction Socket". Lecture with Dr. Raffaele Cavalcanti.

The extent of post-extraction bone modeling depends on the facial bone wall thickness. Bone graft in association with soft tissue punch graft or collagen barrier membranes or collagen matrices, has shown that grafting of extraction sockets is effective to reduce the degree of dimensional alterations.

Dr. Raffaele Cavalcanti
DDS, PhD, Italy

15.15-15.45 Coffee break and Exhibition.

15.45-16.45

"Soft tissue management". Lecture with dr. Raffaele Cavalcanti.

More recently, research has focused on collagen matrices as connective tissue graft substitutes, in order to reduce post-operative discomfort and morbidity. Lecture about the most effective techniques for the management of soft tissue defects in mucogingival and peri-implant surgery.

16.45-17.15

"The future with 3D designed and printed Titanium meshes."

With Dr. Lars Pallesen. Preliminary experience.

Closing remarks – Day 1.

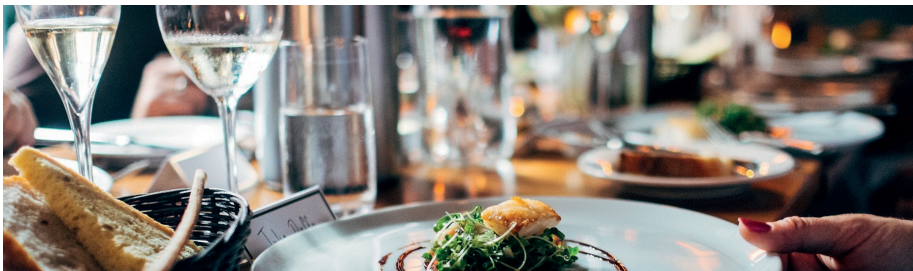

Dr. Lars Pallesen
Oral & Maxillofacial Surgeon
DDS, Denmark

17.30

Bus transfer to hotel (Hotel Admiral).

20.00

Dinner in Copenhagen.

SATURDAY NOVEMBER 30TH 2019

08.30

Bus transfer from hotel (Hotel Admiral).

09.00-10.30

"Periapical Surgery – How to perform and why should you do like this?" Lecture with Dr. Dan-Åke Vålivaara .

A periapical surgery procedure is a good treatment alternative to lengthening the function of a previously root-filled tooth with persistent apical periodontitis. The lecture will cover the indications and the up to date surgical technique and research.

Dr. Dan-Åke Vålivaara
DDS, Maxillofacial Surgeon, Sweden

10.30-11.00

Coffee + Exhibition.

11.00-12.00

"Piezotome application in the everyday practice from atraumatic tooth-extraction to simple bone-management procedures".

Lecture with Dr. Angelo Troedhan

The extent of post-extraction bone modeling depends on the facial bone wall thickness. Bone graft in association with soft tissue punch graft or collagen barrier membranes or collagen matrices, has shown that grafting of extraction sockets is effective to reduce the degree of dimensional alterations.

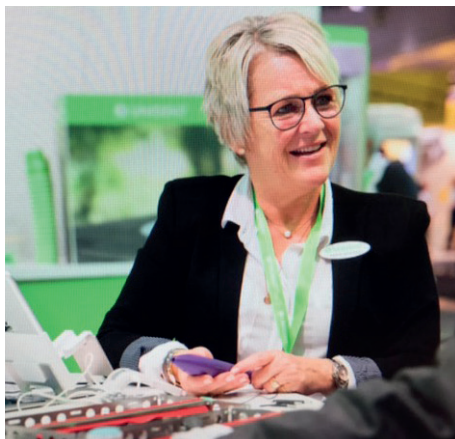

Dr. Angelo Troedhan
Dr.Dr., PhD, DMD, MD, Prof., Austria

12.00-12.30

Closing remarks by Dr. Lars Pallesen and Marinette Dahlén, Unident.

12.30-13.30

Lunch.

Outside the lecture hall you will meet Surgery Specialists from Unident in our exhibition area.

”Combine implant surgery with orthodontic treatment using Invisalign”

In the exhibition Dr. Martin will demonstrate how he combines implant surgery with Invisalign for optimal implant placement.

Dr. Martin Lüpbert has been an Invisalign provider since 2013. From that time, he has started over 200 cases.
